Profile

I have a BFA in illustration and I'm looking for a full-time position in the production of 2D game art & illustration. My passions also include board & card game design, children's illustration, book illustration, stationary, greeting cards, and computer graphics.

Through heartfelt narratives and interactive elements, I hope to reach out and touch others in a positive way with my artwork, whether it be in offering the reprieve of a game or the comfort of an illustrated children's tale. Ultimately I hope I can create work which encourages positive interactions and a light heart in those experiencing it.
